Check	Concerns	✓	Description
Stitching			All stitching must be free of freying and be in good condition.
Webbing			The webbing must be free of damage and freying.
Locking Karabiner			The locking karabiner must open and close correctly, with the spring lock working properly.
Leg Straps			The legs straps must be free from tears and freying. The straps attaching the leg pads must not be twisted.
Body Straps			The body straps must be free from tears and freying and must not be twisted.
Knots			The knots should be dressed properly with the locking karabiner in the correct orientation - the karabiner should be larger end towards the harness clip in.
Leg Strap Clips			The leg strap clips must open and close correctly with the release buttons locking after the attachment is secured.
