

GENERAL NOTES

- Bottom section 5000mm-6000mm aluminium scaffolding pipe.
- Top section 1000mm-2000mm aluminium scaffolding pipe.
- Top and bottom joined with a scaff joiner. Bolted (M10 x 75mm instead of standard grub screws).
- Top connected to counterweight fly bar with a single barrel clamp. Pipe is bolted with M10 x 75mm bolts through both bottom sections of the clamp.
- Aluminum scaffolding pipe diameter 48mm.
- The clamp is finger tightened then the booms are flown out and left to straight so the clamp can be tightened without adding a rotational force to the fly bar.
- There are 6 pipes total. Each holds X par cans.
