

Sunday in the Park with George

Double Purchase Flown Masking

OUT Position

N.B. All positional heights are estimates, and for the purpose of demonstrating the mechanism

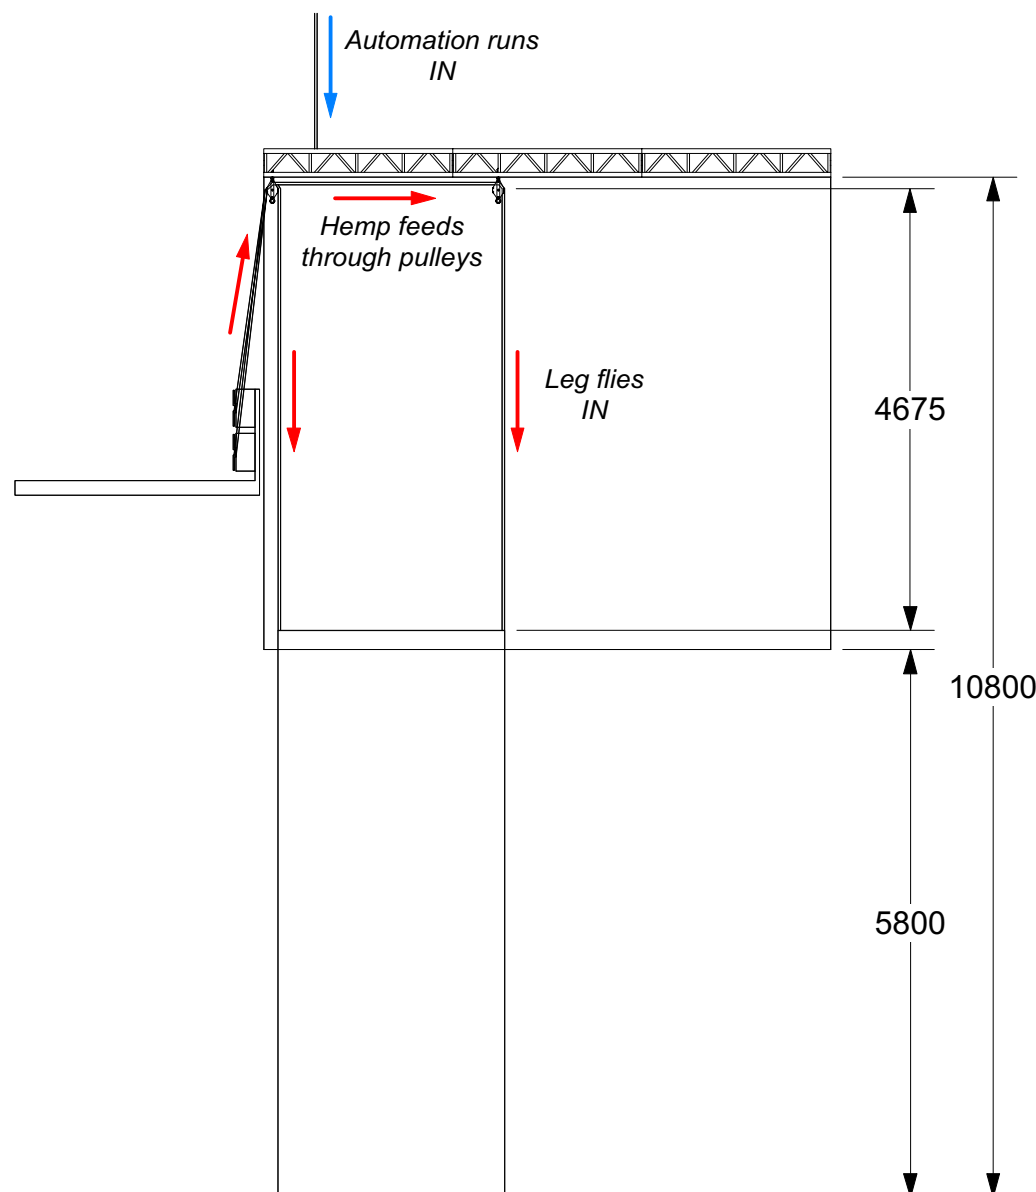

- Truss trimmed as close to the grid as practical
- Hard leg is mostly hidden behind border
- Hemp lines run from border to spot pulleys, then to end of truss
- Hemp lines run from end of truss to fly rail
- System is fully above highest lighting bar trim

IN Position

N.B. All positional heights are estimates, and for the purpose of demonstrating the mechanism

- Hard legs rest on the ground
- Underside of border at trim height of 5800mm
- The relative movement of legs is double that of the border

System devised by Jamie McQueen and James Hamilton

N.B. Drawings are for guidance only. Rigging and operation of the system should only be undertaken by competent persons with appropriate supervision.
