Check	Concerns	✓	Description
Screws			The screws are imperial and therefore will require an imperial hex key. The screws should not be loose and should be checked before use.
Spade			The spade is the the metal piece that is securing the swivel piece to the plate. To remove the spade, you should loosen the screws and remove the swivel. The spade should then pull out the top of the plate. The spade should be kept greased up.
Stitching			There should be no frayed stitching on the harness.
Leather pad			The inside pad of the harness is made of leather to protect the metal. The leather is covered by a cloth velcro pad. The leather should be in good condition and cannot be cracked or dried out.
Webbing			The webbing should be checked along the join of the metal plate and the cloth material. The webbing along the straps should also be checked to make sure they are in good condition.
Shackle+ Maillon			The shackle should be locked off and in good condition. No cracks in the metal or major scuffs should be seen.
Swivel			The swivel should be able to spin freely without any imovability.
Pads			The leg pads should be free from any rips or tears and the stitching should be checked beofre use.
