

Steeldeck 7.5

Keynote

Strength

Nothing beats Steeldeck 7.5 for strength and durability.

Our four-leg 8'x4' unit supports an amazing 2.2 tonnes - enough to ensure safety and peace of mind under almost any circumstances.

System

The Steeldeck system has been supporting performers and production teams for so long now that it is easy to take it for granted.

Maltbury's Steeldeck 7.5 offers a certified 7.5kN/m² on a four-leg 8'x4' deck. But don't imagine all this strength makes it less responsive to your needs.

Steeldeck 7.5 offers you the widest range of applications and a durability that is legendary.

IDEAL FOR

- Large stages needing the fastest set-up times
- Stages with a particularly heavy load to handle
- Venues which can use extensive under-stage storage
