

# PROP MAKING: HAT/MASK STANDS

The director and designer required 2 stands to hold in place 2 masks on stage. The stands had to be shorter than the actual size of the masks so that these would look slightly loose.

## MATERIALS

- Stair Newels
- Wooden Base

- Self Tapping Screws
- Vinyl Glue
- Acrylic Paint
- Paint Brush

## INSTRUCTIONS

Once we gathered all the materials we started to build our stand with the help of the construction workshop that created the base and assembled it to the newel using vinyl glue and self tapping screws. We then painted the stands with white acrylic paint.
